The Mosaic Company

Jim Prokopanko, President and Chief Executive Officer

November 2013
This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements include, but are not limited to, statements about the proposed acquisition and assumption of certain related liabilities of the Florida phosphate assets of CF Industries, Inc. (“CF”) and the ammonia supply agreements with CF; the benefits of the transactions with CF; future strategic plans and certain related liabilities and other statements about future financial and operating results. Such statements are based upon the current beliefs and expectations of The Mosaic Company’s management and are subject to significant risks and uncertainties. These risks and uncertainties include but are not limited to risks and uncertainties arising from the possibility that the closing of the proposed phosphate assets acquisition may be delayed or may not occur, including delays arising from any inability to obtain governmental approvals of the transaction on the proposed terms and schedule and the ability to satisfy other closing conditions; difficulties with realization of the benefits of the transactions with CF, including the risks that the acquired assets may not be integrated successfully or that the cost or capital savings from the transactions may not be fully realized or may take longer to realize than expected, regulatory agencies might not take, or might delay, actions with respect to permitting or regulatory enforcement matters that are necessary for Mosaic to fully realize the benefits of the transactions including replacement of CF’s escrowed financial assurance funds, or the price of natural gas or ammonia changes to a level at which the natural gas based pricing under one of the long term ammonia supply agreements with CF becomes disadvantageous to Mosaic; customer defaults; the effects of our decisions to exit business operations or locations; the predictability and volatility of, and customer expectations about, agriculture, fertilizer, raw material, energy and transportation markets that are subject to competitive and other pressures and economic and credit market conditions; the level of inventories in the distribution channels for crop nutrients; changes in foreign currency and exchange rates; international trade risks; changes in government policy; changes in environmental and other governmental regulation, including greenhouse gas regulation, implementation of numeric water quality standards for the discharge of nutrients into Florida waterways or possible efforts to reduce the flow of excess nutrients into the Mississippi River basin or the Gulf of Mexico; further developments in judicial or administrative proceedings, or complaints that Mosaic’s operations are adversely impacting nearby farms, business operations or properties; difficulties or delays in receiving, increased costs of or challenges to necessary governmental permits or approvals or increased financial assurance requirements; resolution of global tax audit activity; the effectiveness of the Company’s processes for managing its strategic priorities; the ability of the Northern Promise joint venture among Mosaic, Ma’aden and SABIC to obtain project financing in acceptable amounts and upon acceptable terms, the future success of current plans for the joint venture and any future changes in those plans; adverse weather conditions affecting operations in Central Florida or the Mississippi River basin or the Gulf Coast of the United States, and including potential hurricanes, excess rainfall or drought; actual costs of various items differing from management’s current estimates, including, among others, asset retirement, environmental remediation, reclamation or other environmental regulation, Canadian resources taxes and royalties, or the liabilities Mosaic is assuming in the proposed phosphate assets acquisition; brine inflows at Mosaic’s Esterhazy, Saskatchewan, potash mine or other potash shaft mines; other accidents and disruptions involving Mosaic’s operations, including potential mine fires, floods, explosions, seismic events or releases of hazardous or volatile chemicals, as well as other risks and uncertainties reported from time to time in The Mosaic Company’s reports filed with the Securities and Exchange Commission. Actual results may differ from those set forth in the forward-looking statements.

We expect to generate appropriate risk-adjusted returns for each investment. We expect investments to be financed through foreign cash and operating cash flow.

* Not fully approved investments
Purchase of CF Industries’ phosphate business for $1.2 billion in net cash. Assets include:

- Mine, beneficiation plant and 70 million tonnes of proven and probable reserves.
- ~1.8 million tonnes of annual finished phosphate capacity.

Strategic natural gas price based ammonia supply agreement for up to 15 years:

- Supply of up to 725,000 tonnes annually.

Significantly lowers planned capital spending:

- Avoid $1.1B in planned capital outlay for ammonia plant.

Significant mining, operational and logistics synergies:

- EPS accretion of ~$0.30 in 2015, excluding any debt financing costs and assuming 427 million shares.
- Projected 2015 EBITDA, including synergies, ~$230 million*. 

* EBITDA is gross margin plus selling, general and administrative expenses but excluding deductions for depreciation, depletion and amortization.
Conclusions

- In this capital intense, cyclical business, creating value is about long-term capital allocation. Winners not only recognize and respect the cycle, but take advantage of the opportunities it presents.

- We are addressing the things we can control, and have made considerable strategic progress over the past year.

- Mosaic is uniquely positioned to take advantage of near-term cyclical trends and to capitalize on long-term secular opportunities, and you should expect us deliver.
