The Mosaic Company Reports First Quarter 2019 Results

PLYMOUTH, Minn.--(BUSINESS WIRE)-- The Mosaic Company (NYSE: MOS) reported first quarter 2019 results.

Highlights:

- Mosaic reported first quarter 2019 net earnings of $131 million compared to $42 million last year, and diluted earnings per share (EPS) of $0.34 compared to $0.11 last year, both on revenues of $1.9 billion.

- For the period, adjusted EBITDA\(^{(1)}\) was $430 million compared to $399 million in the prior year period, and EPS\(^{(1)}\) was $0.25 compared to $0.20 in the prior year period.
  - Notable items in the quarter primarily related to foreign currency transaction gain, unrealized gain on derivatives, and gain due to fair value adjustment of the earnout liability related to the acquisition of Vale Fertilizantes.
  - In the quarter, higher costs impacted all of Mosaic’s businesses, including costs associated with impacts of weather in North America and regulatory changes in Brazil. Combined, costs related to maintenance and down time negatively impacted gross margin by $77 million, including $9 million the company designated a notable item, compared to $37 million in the prior year period. These costs negatively impacted first quarter 2019 EPS by $0.15 per share and adjusted EPS by $0.13 per share.

- The Company revised its full-year adjusted EBITDA\(^{(1)}\) guidance to $2.0 to $2.3 billion, and adjusted EPS\(^{(1)}\) guidance to $1.50 to $2.00, primarily reflecting the impact of curtailments and higher costs associated with the impact of new tailings dam regulations in Brazil, the increase in Canadian resource taxes, and delayed recovery in phosphate margins. EPS guidance was also impacted by an increase in the estimated full year effective tax rate.

“Mosaic overcame weather and regulatory changes to deliver solid results. We expect our resilient and strong business to generate good results this year and across the business cycle,” said Joc O’Rourke, President and Chief Executive Officer.

Cash flow used by operating activities in the first quarter of 2019 was $176 million compared to $71 million used in the prior year period. The first quarter typically reflects a seasonal inventory build that increases working capital. The Company continues to expect strong cash flow generation for the full year. Capital expenditures totaled $314 million in the quarter. Mosaic’s total cash and cash equivalents, excluding restricted cash, were $385 million compared with $848 million a quarter ago, largely due to the exacerbated seasonal increase in inventories. Long-term debt was $4.6 billion as of March 31, 2019.

Brazil Tailings Dams Update

Three Mosaic Fertilizantes mines are currently curtailed as the Company executes its plan to meet new regulatory requirements for tailings dams. The Company continues to work with independent engineers and regulators to complete required remediation efforts, obtain dam safety certificates and return to full operations. The Catalão mine is expected to be at full operating rates by the end of the second quarter, while the Tapira and Araxá mines are expected to be at full operating rates by the end of the third quarter.

While mining is suspended, the Company expects to continue to process available rock inventory to maintain finished product sales. Mosaic Fertilizantes will supplement requirements with imported rock from the Company’s mine in Peru and finished phosphates from Mosaic’s Florida operations to meet Brazilian customer needs.

Mosaic expects to ship up to 600,000 tonnes of rock from its Peruvian mine replacing approximately 40 percent of the Brazilian mines’ normal output. In addition, depending upon the timing of the mines’ return to full operation, the Company plans to ship up to 300,000 incremental tonnes of finished phosphates from its Florida production facilities to Brazilian customers. The higher delivered cost of Miski Mayo rock, combined with the costs of underutilization of mines...
and chemical plants, is expected to increase expenses by approximately $50 million in the second quarter, and up to $100 million in the full year 2019.

### Phosphates Results*

<table>

</tr>
<tr>
<td>Adjusted Gross Margin (non-GAAP) per tonne(1)</td>
<td>$36</td>
<td>$81</td>
<td>$57</td>
</tr>
</tbody>
</table>

*Tonnes = finished product tonnes

Net sales in the Phosphates segment were $806 million for the first quarter, down from $866 million last year, primarily driven by lower sales volumes. Average selling prices were essentially flat and raw material costs were higher, negatively impacting gross margin per tonne. Gross margin was $55 million for the first quarter compared to $97 million for the same period a year ago.

The cash cost of mined rock in Florida continues to remain elevated, at $43 per tonne, as the Company transitions to new mining areas.

The cash cost of conversion declined slightly year-over-year, and included the impact of the 300,000 tonne curtailment previously announced.

### Potash Results

<table>
<thead>
<tr>
<th></th>
<th>1Q 2019</th>

<td>$61</td>
</tr>
<tr>
<td>Adjusted Gross Margin (non-GAAP) per tonne(1)</td>
<td>$100</td>
<td>$88</td>
<td>$64</td>
</tr>
</tbody>
</table>

Net sales in the Potash segment totaled $504 million for the first quarter, up from $404 million last year, driven by both higher average sales prices and higher sales volumes. Gross margin was $186 million for the first quarter compared to $103 million for the same period a year ago.

The improvement in gross margin was primarily driven by higher average sales prices. MOP cash costs, including brine management costs, were $84 per tonne. MOP cash costs of production were essentially flat to last year’s levels, despite lower operating rates in the current quarter. Cash brine management costs declined to $28 million from $31 million in the year ago period.

### Mosaic Fertilizantes Results*

<table>

<td>$37</td>
</tr>
</tbody>
</table>

*Tonnes = finished product tonnes

Net sales in the Mosaic Fertilizantes segment were $698 million for the first quarter, up from $665 million last year. Gross margin was $52 million, compared to $59 million for the same period a year ago. The year-over-year decrease in gross margin was primarily driven by turnaround costs and costs associated with idling of the Araxá mining complex as a result of the new mining regulations in Brazil. In addition, the prior year period benefited from an inventory fair value adjustment related to the acquisition of Vale Fertilizantes. Higher prices and distribution margins were partially offset by the impact of higher raw material costs and lower production volumes.

Despite the near-term tailings dam related challenges, Mosaic Fertilizantes delivered $69 million in gross realized synergies in the quarter, or $66 million net of costs to achieve them. This represents a run rate in excess of previously stated targets. For the full year 2019, Mosaic continues to believe it will achieve $275 million in targeted net synergies.

### Other

Selling, General and Administrative (SG&A) expenses were $94 million for the first quarter, flat with the first quarter of 2018.
The tax rate during the first quarter of 2019 was 26 percent and was above guidance due to changes in the forecasted mix of earnings from various tax jurisdictions. The full year 2019 effective tax rate is expected to remain in the mid to high 20 percent range. Net cash income tax payments in 2019 are expected to be approximately $75 million.

Financial Guidance

While the Company’s expectations for Potash remain strong, margin pressure on the Phosphates business has lasted longer than originally anticipated, and Mosaic Fertilizantes will have increased costs related to the changing tailings dam regulations. Combined, these factors have resulted in the Company revising adjusted EBITDA guidance. In addition, adjusted EPS guidance is impacted by an increase in the assumed effective tax rate.

Mosaic has updated earnings guidance ranges:

<table>
<thead>
<tr>
<th>$ in billions except per share</th>
<th>2019 Guidance</th>
<th>Reported YTD 3/31/2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adjusted EBITDA(1)</td>

<td>$(5) – $(15) million</td>
</tr>
</tbody>
</table>

*Tonnes = finished product tonnes

(1) See “Non-GAAP Financial Measures” for additional information and reconciliation.

Despite a slow start, the Company’s forecasts assume a normal North American spring application season. In phosphates and potash, lower operating rates related to first quarter curtailments will impact costs of goods sold as those costs run through inventory. In addition, the late start to the North American spring has impacted potash operating rates into the second quarter.

In the Mosaic Fertilizantes segment, the Company expects up to $100 million in costs associated with managing through the tailings dam regulatory changes, approximately $50 million of which will flow through cost of goods sold and gross margin during the second quarter of 2019.

Risks and factors that could impact second quarter expectations are primarily related to weather, and its impact on both North American applications and South East Asian demand, as well as foreign currency fluctuations.

For the year, risks also include the timing of completing the work required to recertify the safety of the idled tailings dams, and restart mining operations in Brazil.
The Company is not providing forward looking guidance for U.S. GAAP reported earnings per diluted share or a quantitative reconciliation of forward-looking adjusted earnings per diluted share of non-GAAP adjusted EBITDA. Please see "Non-GAAP Financial Measures" for additional information.

About The Mosaic Company

The Mosaic Company is one of the world's leading producers and marketers of concentrated phosphate and potash crop nutrients. Mosaic is a single source provider of phosphate and potash fertilizers and feed ingredients for the global agriculture industry. More information on the Company is available at www.mosaicco.com.

Mosaic will conduct a conference call on Tuesday, May 7, 2019, at 9:00 a.m. Eastern Time to discuss first quarter 2019 earnings results as well as global markets and trends. Presentation slides and a simultaneous webcast of the conference call may be accessed through Mosaic's website at www.mosaicco.com/investors. This webcast will be available up to one year from the time of the earnings call.

This release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements include, but are not limited to, statements about the anticipated benefits and synergies of our acquisition of the global phosphate and potash operations of Vale S.A. conducted through Vale Fertilizantes S.A. (now known as Mosaic Fertilizantes P&K Ltda) (the “Transaction”), other proposed or pending future transactions or strategic plans and other statements about future financial and operating results. Such statements are based upon the current beliefs and expectations of The Mosaic Company’s management and are subject to significant risks and uncertainties. These risks and uncertainties include, but are not limited to: difficulties with realization of the benefits and synergies of the Transaction, including the risks that the acquired business may not be integrated successfully or that the anticipated synergies or cost or capital expenditure savings from the Transaction may not be fully realized or may take longer to realize than expected, including because of political and economic instability in Brazil or changes in government policy in Brazil, such as higher costs associated with the new mining rules and remediation efforts, or the implementation of new freight tables; the predictability and volatility of, and customer expectations about, agriculture, fertilizer, raw material, energy and transportation markets that are subject to competitive and other pressures and economic and credit market conditions; the level of inventories in the distribution channels for crop nutrients; the effect of future product innovations or development of new technologies on demand for our products; changes in foreign currency and exchange rates; international trade risks and other risks associated with Mosaic's international operations and those of joint ventures in which Mosaic participates, including the performance of the Ma’aden Wa’ad Al Shamal Phosphate Company (also known as MWSPC), the ability of MWSPC to obtain additional planned funding in acceptable amounts and upon acceptable terms, the timely development and commencement of operations of production facilities in the Kingdom of Saudi Arabia, and the future success of current plans for MWSPC and any future changes in those plans; the risk that protests against natural resource companies in Peru extend to or impact the Miski Mayo mine, which is operated by an entity in which we are the majority owner; difficulties with realization of the benefits of our long term natural gas based pricing ammonia supply agreement with CF Industries, Inc., including the risk that the cost savings initially anticipated from the agreement may not be fully realized over its term or that the price of natural gas or ammonia during the term are at levels at which the pricing is disadvantageous to Mosaic; customer defaults; the effects of Mosaic’s decisions to exit business operations or locations; changes in government policy; changes in environmental and other governmental regulation, including expansion of the types and extent of water resources regulated under federal law, carbon taxes or other greenhouse gas regulation, implementation of numeric water quality standards for the discharge of nutrients into Florida waterways or efforts to reduce the flow of excess nutrients into the Mississippi River basin, the Gulf of Mexico or elsewhere; further developments in judicial or administrative proceedings, or complaints that Mosaic’s operations are adversely impacting nearby farms, business operations or properties; difficulties or delays in receiving, increased costs of or challenges to necessary governmental permits or approvals or increased financial assurance requirements; resolution of global tax audit activity; the effectiveness of Mosaic’s processes for managing its strategic priorities; adverse weather conditions affecting operations in Central Florida, the Mississippi River basin, the Gulf Coast of the United States, Canada or Brazil, and including potential hurricanes, excess heat, cold, snow, rainfall or drought; actual costs of various items differing from management’s current estimates, including, among others, asset retirement, environmental remediation, reclamation or other environmental regulation, Canadian resources taxes and royalties, or the costs of the MWSPC, its existing or future funding and Mosaic’s commitments in support of such funding; reduction of Mosaic’s available cash and liquidity, and increased leverage, due to its use of cash and/or available debt capacity to fund financial assurance requirements and strategic investments; brine inflows at Mosaic’s Esterhazy, Saskatchewan, potash mine or other potash shaft mines; other accidents and disruptions involving Mosaic’s operations, including potential mine fires, floods, explosions, seismic events, sinkholes or releases of hazardous or volatile chemicals; and risks associated with cyber security, including reputational loss; as well as other risks and uncertainties reported from time to time in The Mosaic Company’s reports filed with the Securities and Exchange Commission. Actual results may differ from those set forth in the forward-looking statements.

Non-GAAP Financial Measures
For the three months ended March 31, 2019, the Company reported the following notable items which, combined, positively impacted earnings per share by $0.09:
